

LEARNING COLLEGE PRINCIPLES

The learning college is based on six key principles:

- ❖ The learning college creates substantive change in individual learners.
- ❖ The learning college engages learners in the learning process as full partners who assume primary responsibility for their own choices.
- ❖ The learning college creates and offers as many options for learning as possible.
- ❖ The learning college assists learners to form and participate in collaborative learning activities.
- ❖ The learning college defines the roles of learning facilitators by the needs of the learners.
- ❖ The learning college and its learning facilitators succeed only when improved and expanded learning can be documented for its learners.
