

# Student Flowchart Protocol for COVID-19 Reporting and Return to Campus

**Use of the Campus Clear App, a self-screening strategy for controlling the spread of COVID-19, is required to gain access to campus.**

\* For COVID-19, a close contact is defined as any individual who was within 6 feet of an infected person for at least 15 minutes starting from two days before illness onset (or, for asymptomatic patients, two days prior to positive specimen collection) until the time the patient is isolated.

Student had close contact\* with someone who tested positive or is suspected of having COVID-19

May return after 14-day self-quarantine period from date of last contact with individual

Student is responsible for notifying instructors, who are responsible for notifying the COVID-19 Coordinator and the dean or executive director

The COVID-19 Coordinator instructs the student to contact their health care provider and be tested for COVID-19; informs the student to mandatory self-quarantine for 14 days after last contact with COVID-19 individual

Student tested positive or is suspected of having COVID-19 AND had symptoms

May return after at least 10 days have passed since date of first positive COVID-19 test

Student is responsible for notifying instructors, who are responsible for notifying the COVID-19 Coordinator and their dean or executive director

The COVID-19 Coordinator instructs the student to email their COVID-19 test results and to self-quarantine for 10 days since symptom onset or date of test; student provides the COVID-19 Coordinator with the date and location of last on campus attended class

The COVID-19 Coordinator contacts Custodial Services to deep clean areas of contact

The COVID-19 Coordinator sends a letter to each person the infected student states they had contact with on campus. The letter will inform students whether or not the class must be quarantined based upon circumstances

Student tested positive for COVID-19, but had NO symptoms

May return after at least 10 days have passed since date of first positive COVID-19 test

Student exhibits one or more symptoms of COVID-19, but is not suspected of having COVID-19

Some examples: seasonal allergies, ear infection, seasonal flu, strep throat, migraine, etc. May be possible to return in fewer than 10 days after onset of symptoms and 24 hours fever-free

Student is responsible for notifying instructors, who are responsible for notifying the COVID-19 Coordinator and the dean or executive director

The COVID-19 Coordinator will contact student to assess evidence of alternative reason for symptoms and/or release to return to class

Student had contact (not close contact\*) with someone whose family member tested positive for COVID-19

Student has no reporting obligation and may attend class

Individual Returns from International Travel to CDC "Level 3" Country  
*Refer to CDC COVID-19 Travel Recommendations by Destination*

Recommended 14-day quarantine from date of return from trip

### IMPORTANT NOTES:

This protocol was developed in keeping with guidance from the Centers for Disease Control and Prevention, the Illinois Department of Public Health and the legal firm Robbins Schwartz. Protocols are subject to change and may vary on a case-by-case basis.

Quarantine days differ from column 1 to columns 2 & 3 because of positive testing for COVID-19 verification in columns 2 & 3.
